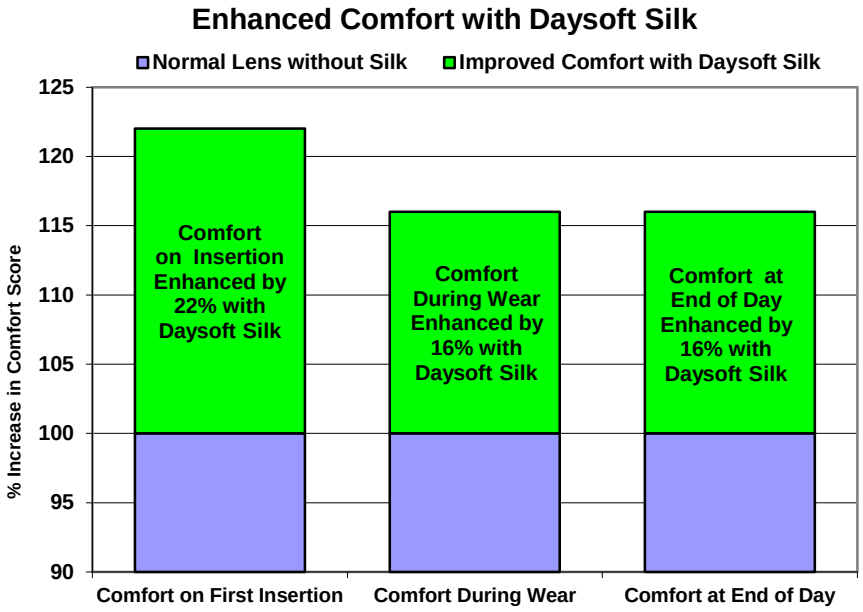
Introducing Daysoft Silk

The main factors that influence contact lens wearers are Comfort, Cost and Convenience.

Daysoft is dedicated to the supply of daily disposable contact lenses (the healthiest and most convenient way to wear lenses) at the most affordable price.

Now, for even greater comfort, we will be packaging our lenses in Daysoft Silk, a saline solution enriched with Hyaluronan (HA), the eye's natural lubricant.



Comfort by Nature.

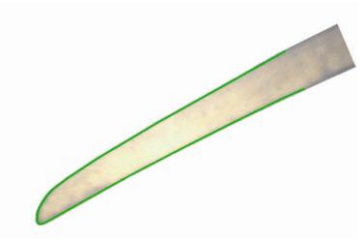
Utilising the properties of HA, Daysoft Silk

- provides the eye's natural lubricant, reducing friction by up to 75%
- hydrates the surface of the eye by holding up to 1000 times its weight of water
- stabilises the tear film, to protect and hydrate the eye throughout the day

Comfort by Design

Daysoft is the only company to mould a fully rounded edge

- gently cushioning the lens onto the eye
- preserving comfort on every blink



↑ fully rounded lens edge

Daysoft Silk, by Nature and Design

- Superior comfort
- Greater moisture retention
- Enhanced cushioning and glide on the eye
- Greater overall satisfaction
